

The EES70 Waste Treatment Controller has two mounting options: mounting tabs or a mounting bracket. When ordering please ensure that you specify which option is required, as there is a small price difference and separate order codes. The following images show the mounting tabs (left) and mounting bracket (right).

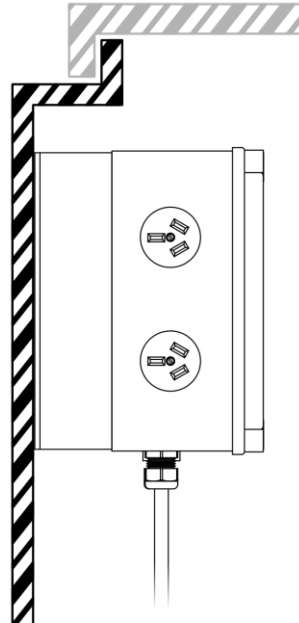

Mounting tabs allow the EES70 to sit flush against the mounting surface (i.e. the inside of the motor box). Mounting brackets space the EES70 out from the mounting surface by 45mm. This enables access to the LCD and keypad on the top side of the unit when being mounted in a motor box with a significant lip:

**MOUNTING TABS**

Order code: EES70-A

**MOUNTING BRACKET**

Order code: EES70-B

If you need any further clarification please don't hesitate to contact us.
